

# Prepared by Kevin Rodriguez

# FEMA Region 6 Weather Threat Briefing

Wednesday, March 13, 2019

**Disclaimer:** The purpose of this briefing is to provide a <u>Regional</u> weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to <u>www.weather.gov/srh</u>.

## Summary of the Upcoming Week

### **Today**

- Severe storms possible today across eastern portions of FEMA 6. The primary hazard will be damaging winds, but hail and a few tornadoes are possible
  - Enhanced risk for severe storms over EAR
  - Slight risk for severe storms over W&C AR/N LA
- Heavy rainfall/flash flooding possible over EAR/N LA
- Strong winds across western half of FEMA 6
- Heavy snow over the mountain passes in N&W NM

## Thursday – Sunday

No significant weather impacts

## River Flooding

- Moderate to Major flooding will continue this week and into next week on the Mississippi River at many locations in EAR/E LA
- The MS Flooding is slightly higher than 2016 & 1997
- Rainfall over the next 5 days may cause new minor river flooding across portions of N and ETX this week

3/13/2019 8:02 AM www.weather.gov/srh

## FEMA Region 6 Threat Matrix

Mar 13, 2019 - Mar 17, 2019

DAY / THREAT	WED	THU	FRI	SAT	SUN
Severe Storms	EAR				
	W&CAR/N LA				
Heavy Rain / Flash Flooding	EAR/N LA				
Winter Weather	N&W NM				
Strong Winds	NM/TX/OK				
Fire Weather					
River Flooding	EAR/E LA	EAR/E LA	EAR/E LA	EAR/E LA	EAR/E LA
	N & ETX	N & ETX	N & ETX	N & ETX	

\*Threat levels are based on FEMA Region 6 criteria.

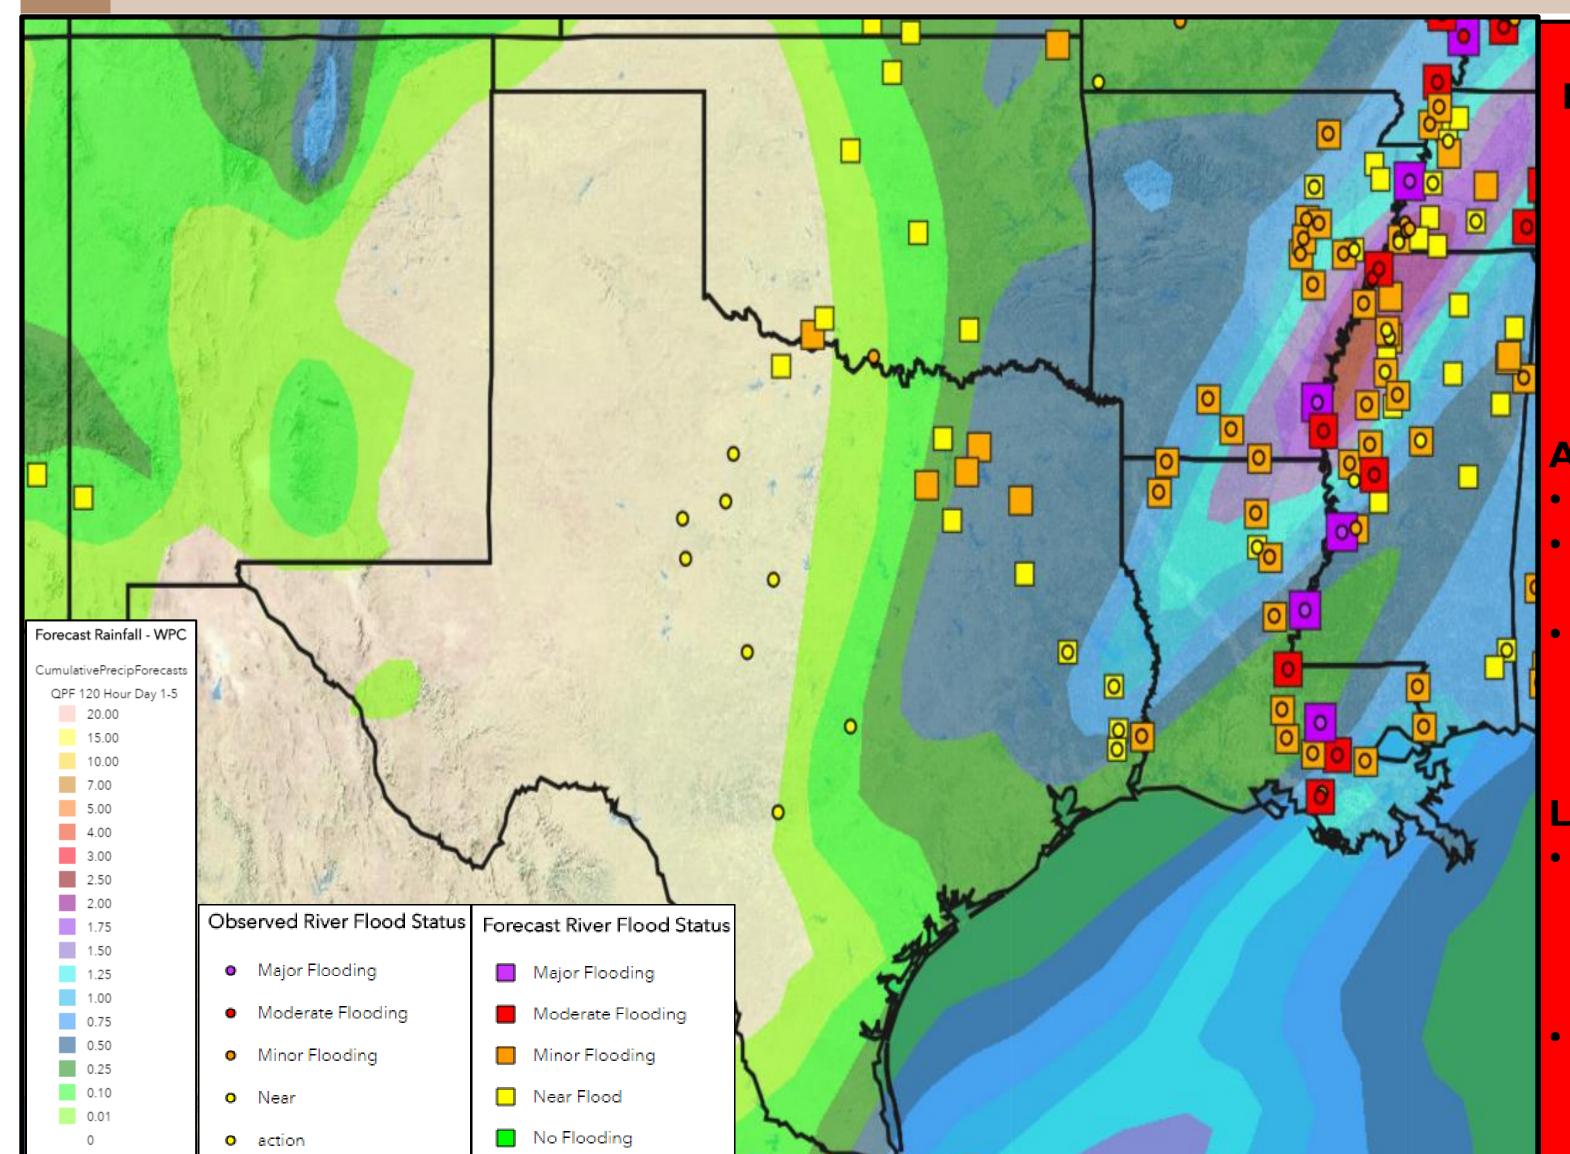

State or local threat level criteria may differ.\*

For more details on the colors in the threat matrix refer to the last slide in this briefing.

## 5-Day Precipitation Forecast & River Flood Status

SR ROC
REGIONAL OPERATIONS CENTER

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Moderate to Major flooding will continue this week on the Mississippi River at many locations in EAR/E LA. The MS Flooding is slightly higher than 2016 & 1997.

Rainfall through today may cause new minor river flooding across portions of N and ETX through this weekend.

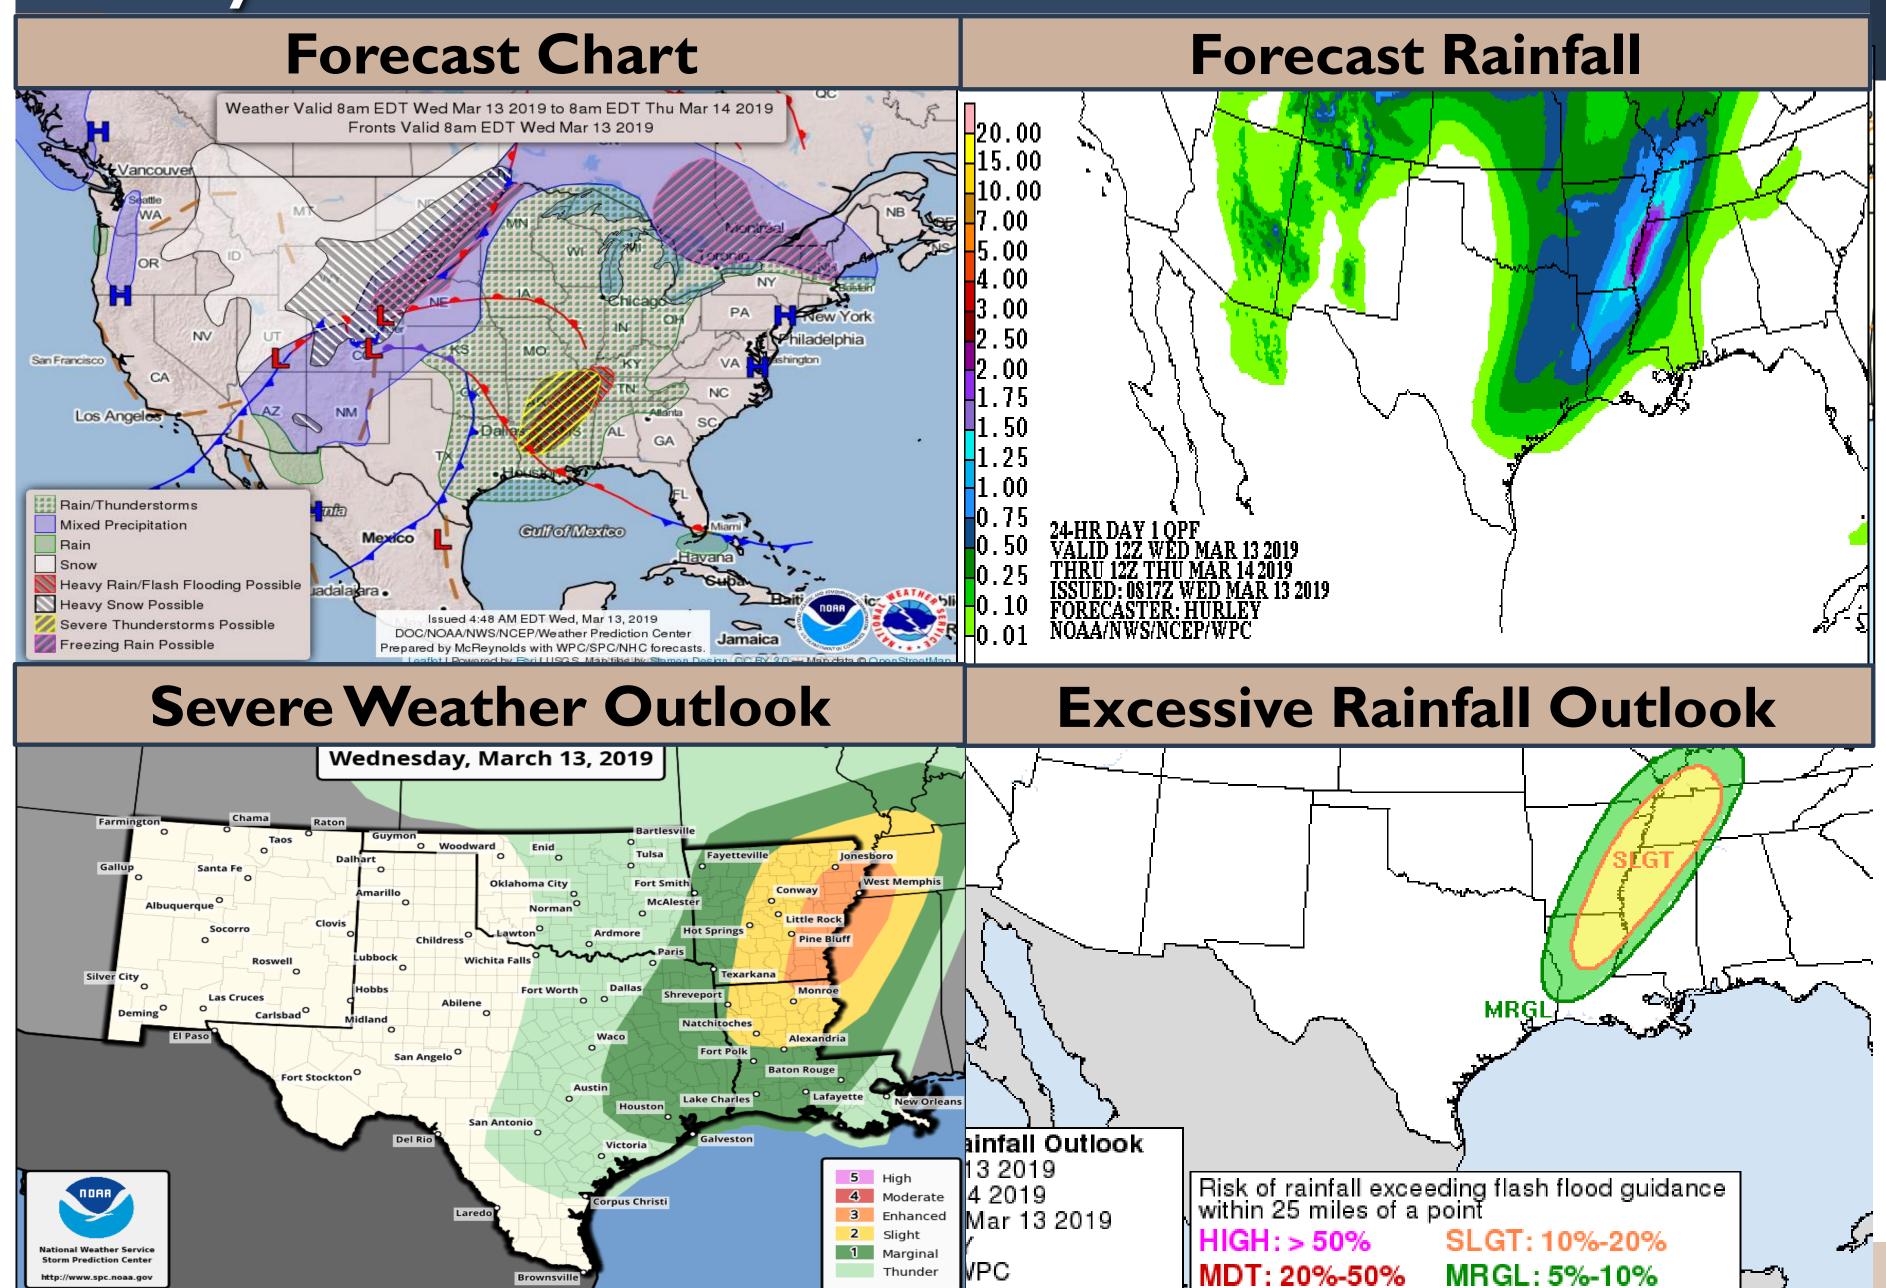

#### **Arkansas**

- All rivers have crested except the MS River.
- Mississippi River at Osceola and near Arkansas City remain at major flood, but have all crested.
- Mississippi River near Greenville, MS is in moderate and is currently cresting right at the threshold for major flood stage.

#### Louisiana

- MS River at Baton Rouge is at Major flood. Shipping and industrial activities are significantly affected. The city of Baton Rouge is protected by levees at the currently forecast levels.
- MS River at Vicksburg and Natchez are at major flood stage with homes and roads impacted.

## Today's Weather

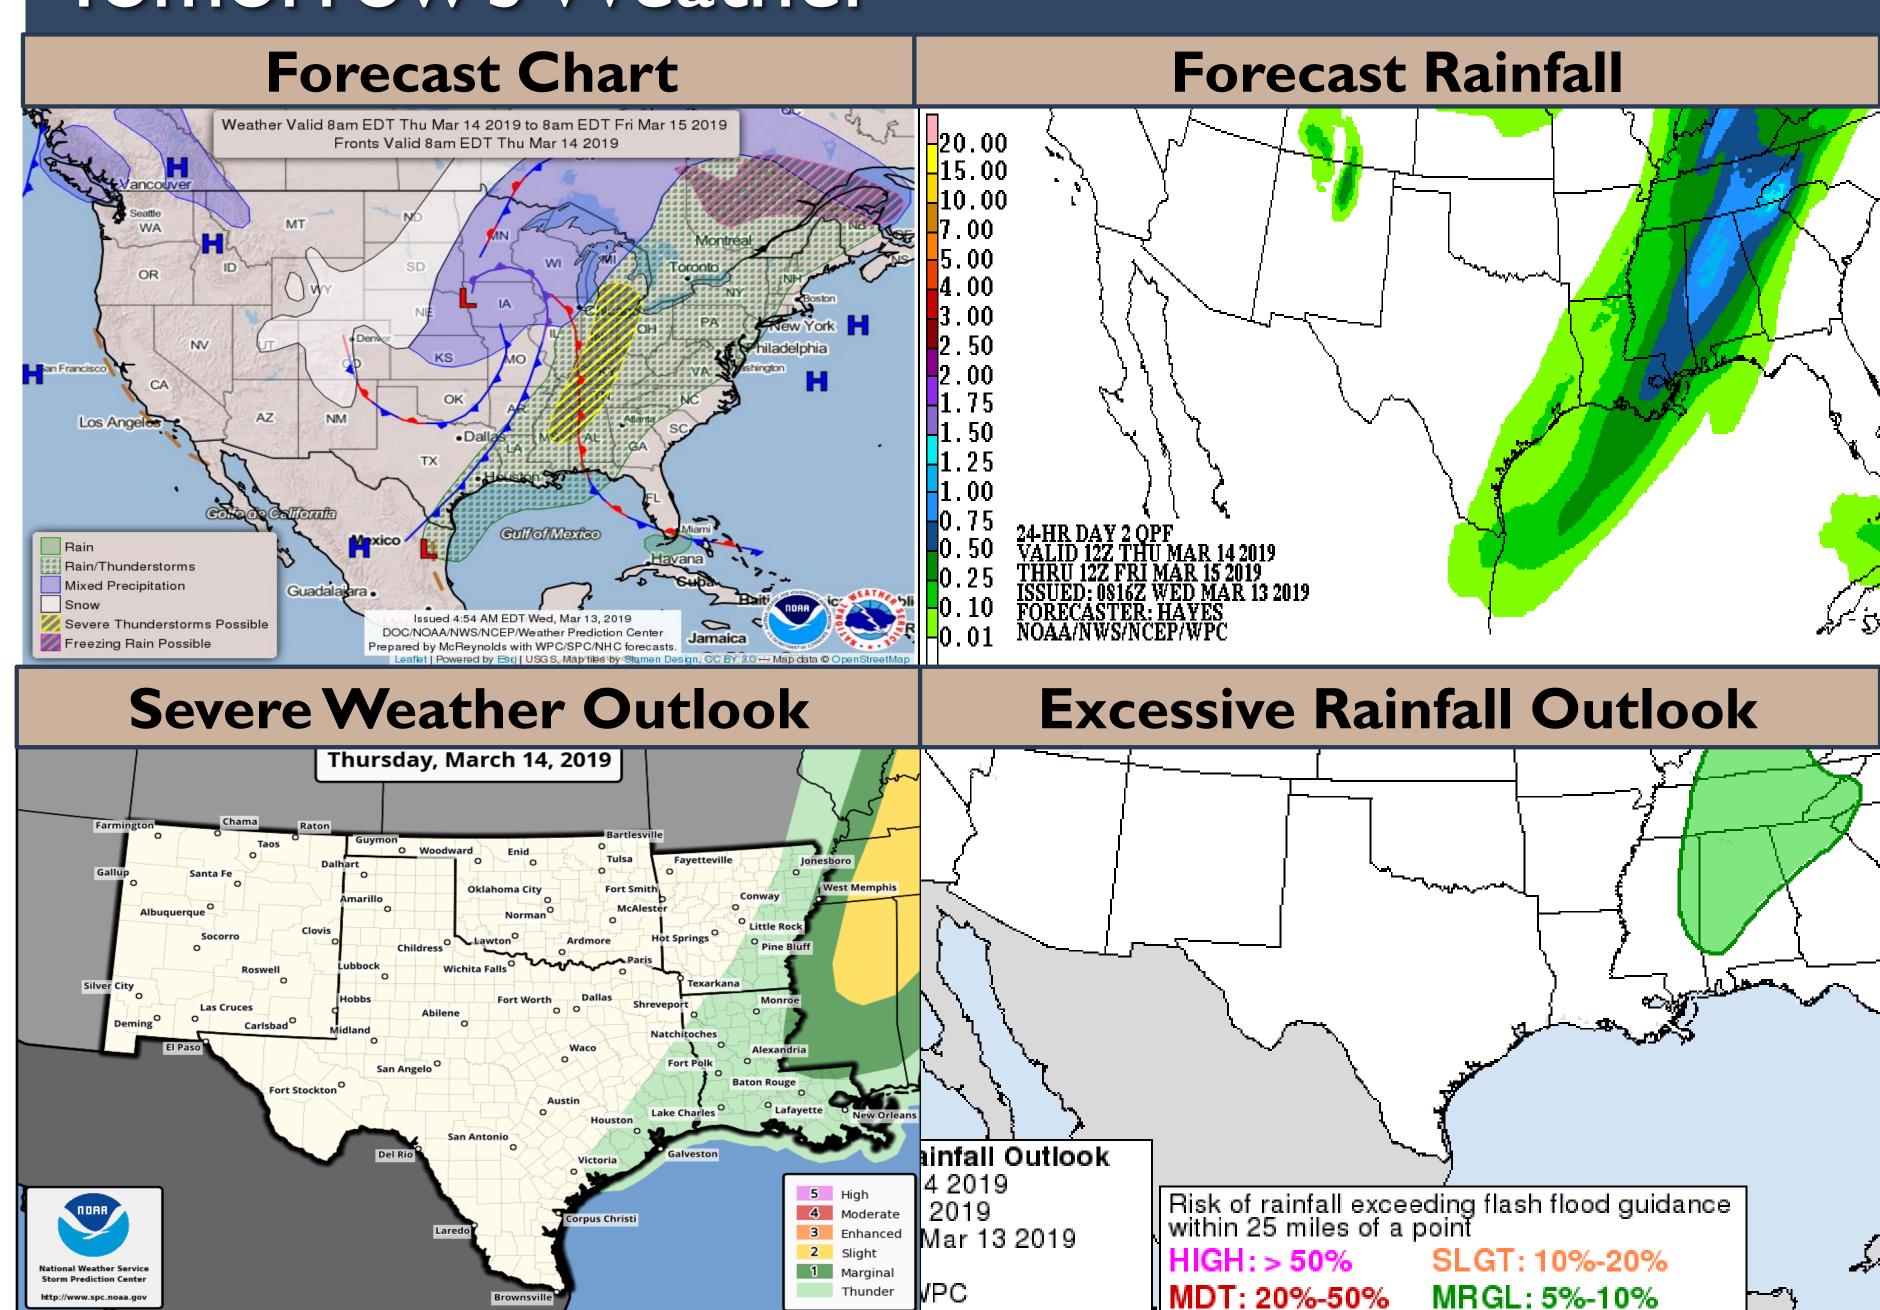

Enhanced risk of severe storms over EAR

Slight risk of severe storms over W&C AR/ N LA

Strong wind across NM/TX and OK

Heavy rain/flash flooding across EAR/N LA

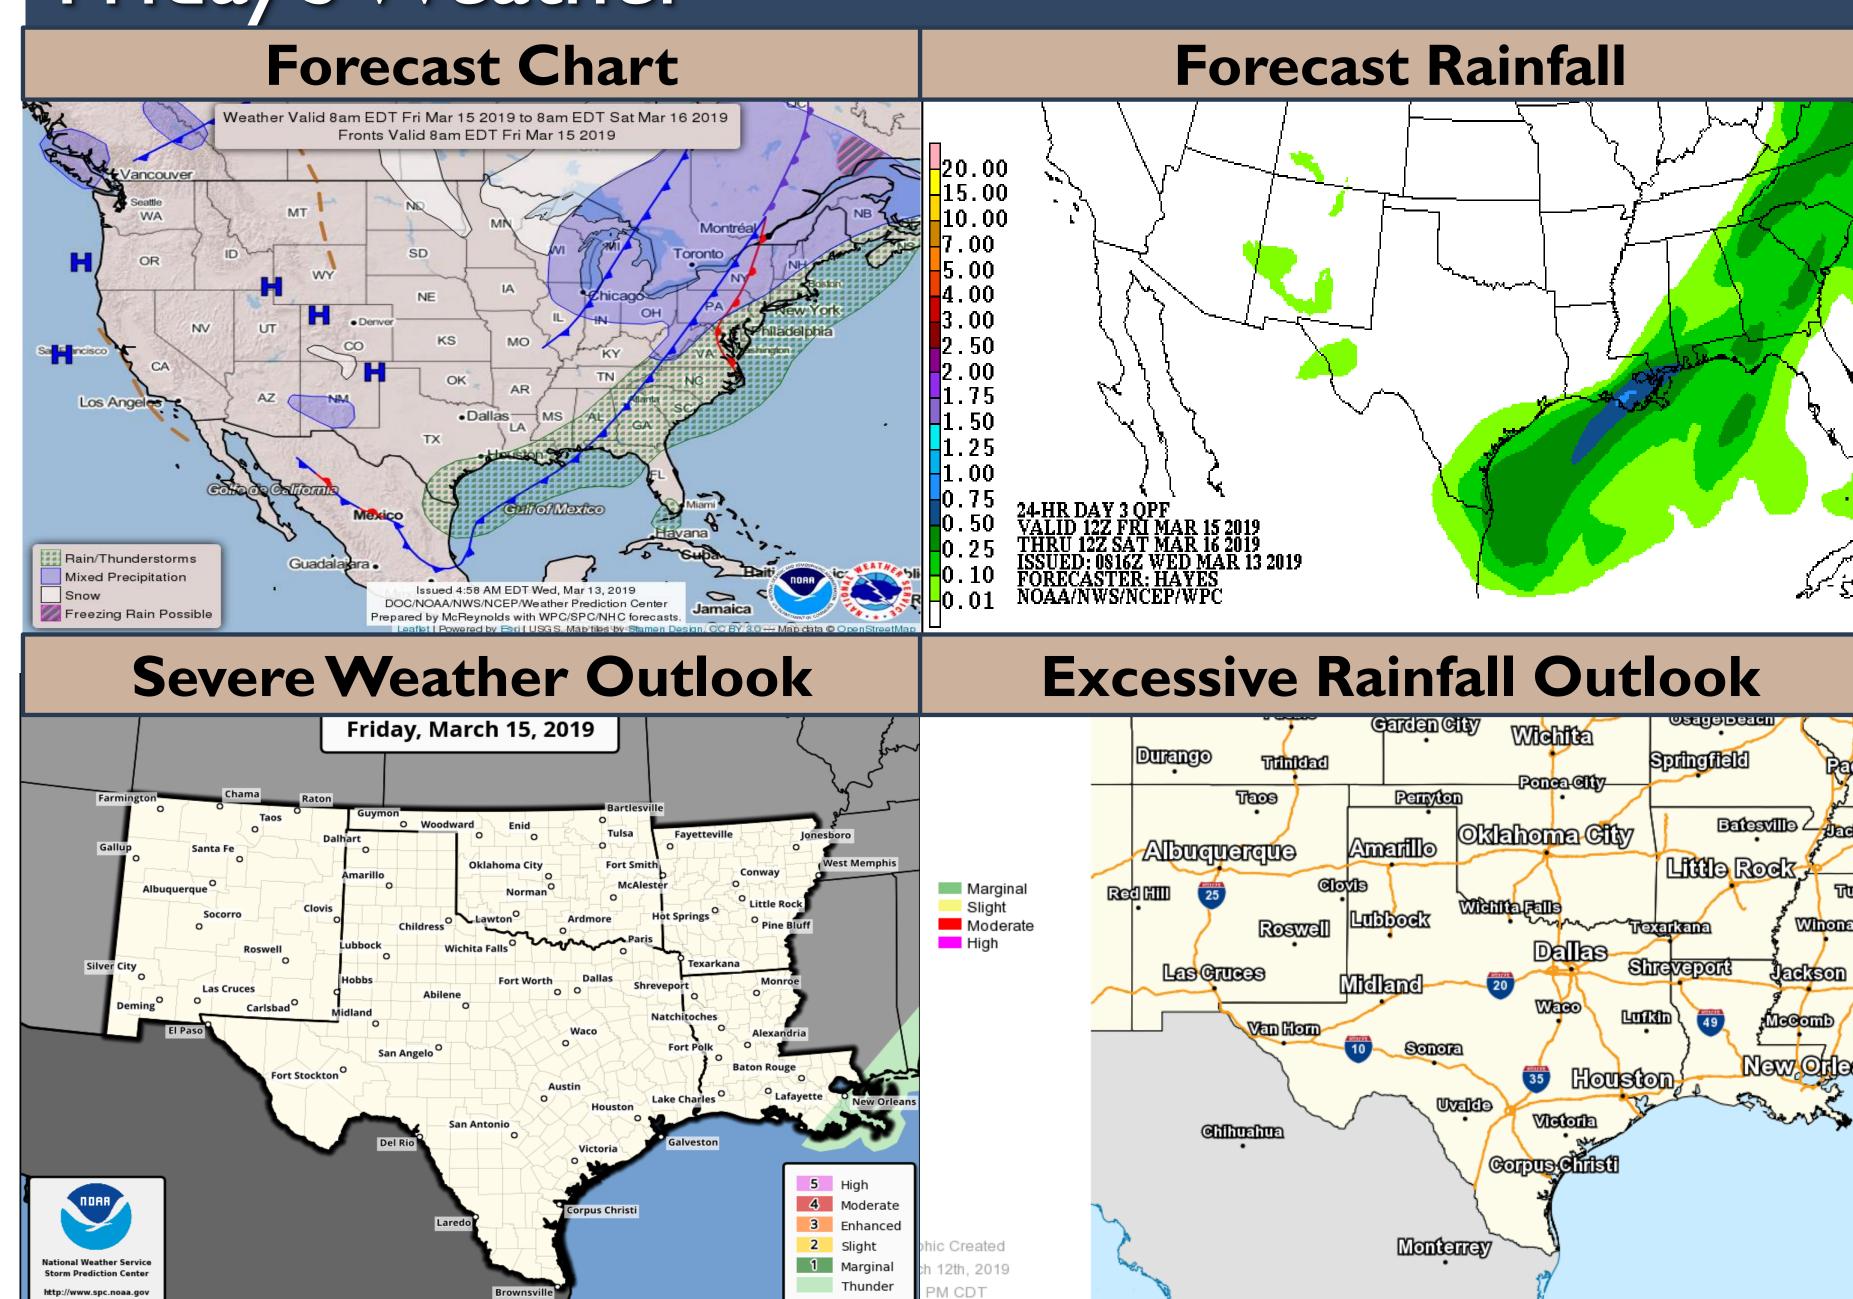

## Tomorrow's Weather

No significant weather impacts expected.

## Friday's Weather

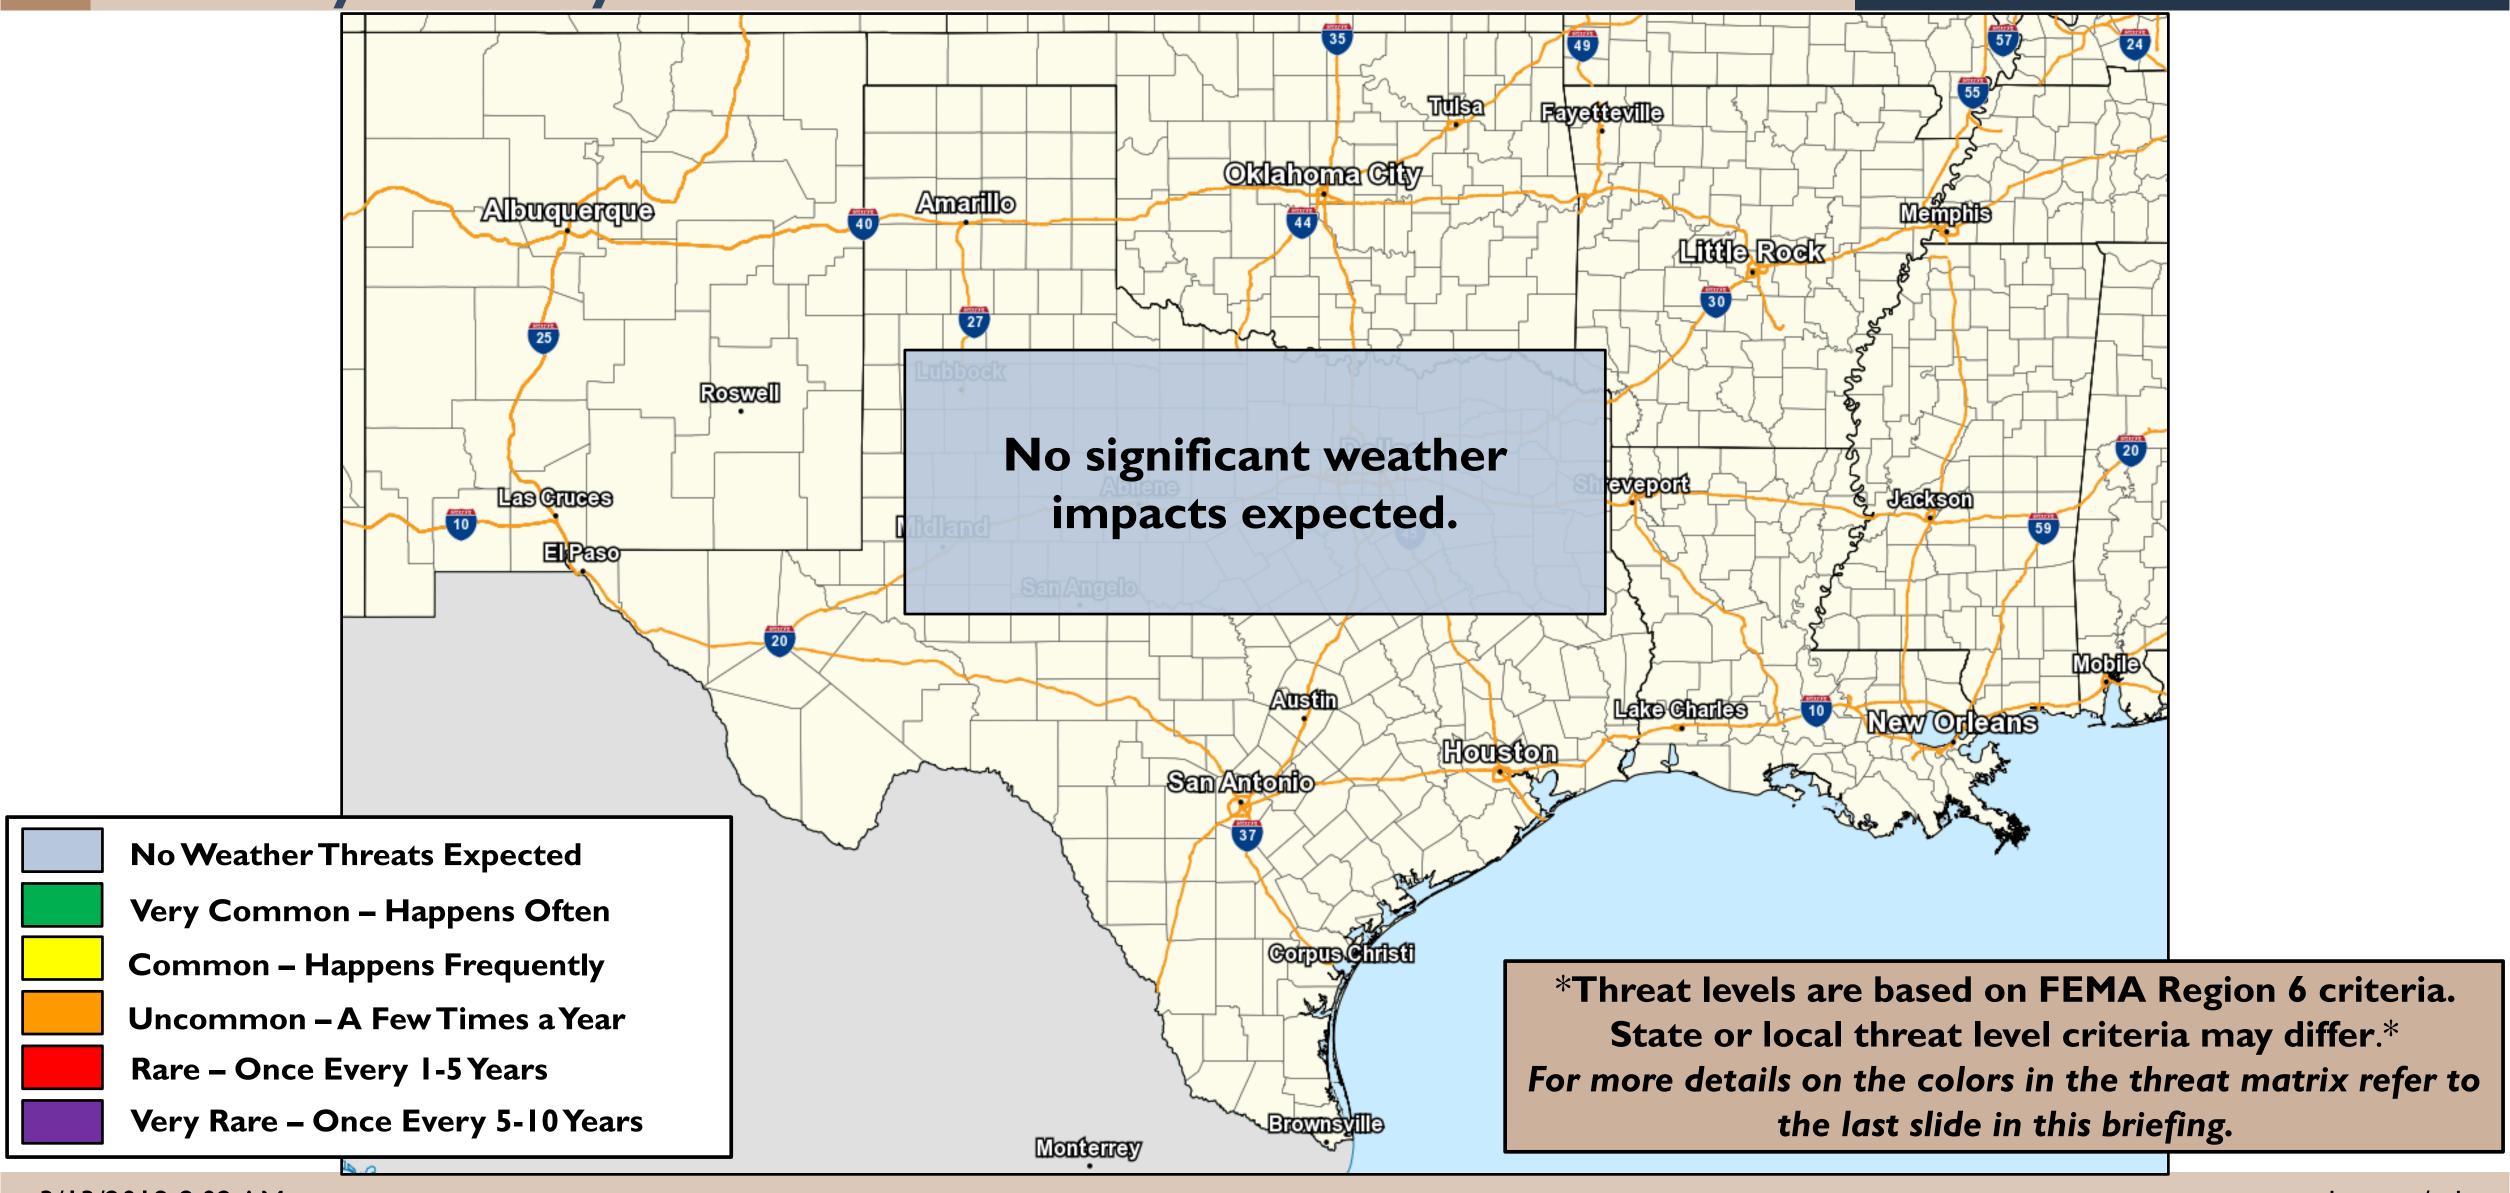

No significant weather impacts expected.

# Days 4-5 Weather Hazards

## Saturday - Sunday

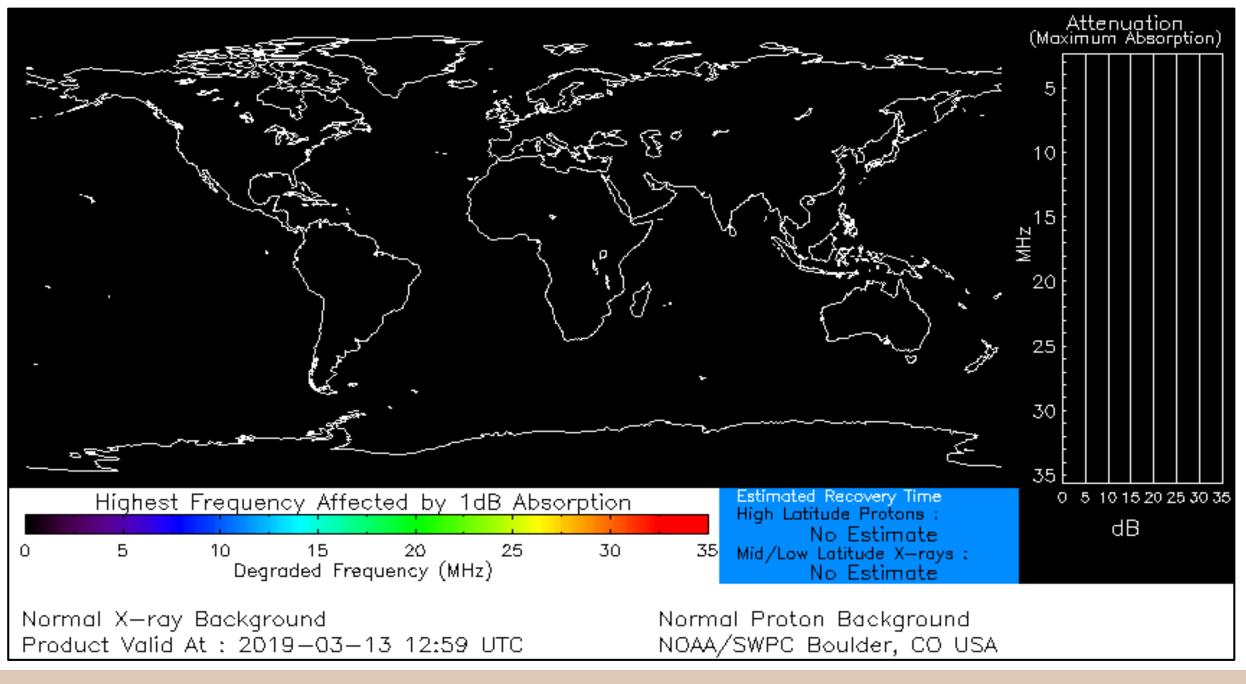

# Space Weather 3-Day Forecast

	Wednesday	Thursday	Friday
Geomagnetic Storms	Unsettled (Max Kp = 3)	Unsettled to Active (Max Kp = 4)	Unsettled to Active (Max Kp = 4)
Solar Radiation Storm (SI-S5)	1%	1%	1%
Radio Blackout (RI-R2)	1%	1%	<b>1%</b>
Radio Blackout (R3-R5)	I%	1%	1%

	Weather "Threat" Matrix							
Color	Definition	Criteria	Example(s)					
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul> <li>Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees</li> <li>Something that happens almost every day in a particular season such as seabreeze storms in coastal TX</li> </ul>					
Yellow	Somewhat Common — Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul> <li>2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible</li> <li>Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail</li> </ul>					
Orange	Uncommon — A Few Times a Year  Safety: Often Threatening to Life and Property, Some  Damage Unavoidable  Impact Potential: Typically Results in Minor Disruption to  Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul> <li>A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely</li> <li>Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail</li> <li>Some large fires reported, burn bans advertised, critical conditions expected</li> </ul>					
Red	Rare — Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul> <li>A Category 1 hurricane will be moving towards the NW Gulf in the next few days</li> <li>Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail</li> <li>Large fires ongoing throughout the area with critical fire weather conditions expected to continue</li> </ul>					
Purple	Very Rare – Once Every 5-10 Years  Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed  Impact Potential: Typically Results in Long-Lived  Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul> <li>A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow</li> <li>Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms</li> </ul>					

Criteria for the color codes in this briefing is to the left, please provide any feedback to
